

SUSTAINABLE DEVELOPMENT

The UN Millennium Development Goals, the UN Global Compact, and the Common Good

Edited by Oliver F. Williams, C.S.C.

“This book offers critical insight into the role businesses must play in cooperation with governments, the United Nations, and civil society to develop more sustainable and healthy societies. *Sustainable Development* eloquently captures the unmistakable correlation between the private sector and the common good: where equality, human rights and ethics thrive, so too does business.” —GEORG KELL, Executive Director, United Nations Global Compact

“Against a sombre picture of global challenges painted by Bishop Kevin Dowling, Fr. Oliver Williams has assembled an outstanding collection of contributions. The first seven essays demonstrate how several diverse multinationals have addressed these challenges both in their core businesses and through their supply chains, and where they have voluntarily taken on projects to advance human rights in the wider society. Papers from authors in academia and civil society then frankly analyze what such corporate efforts really mean in terms of delivering benefits to both shareholders and society, as well as discussing criticisms.” —MARK MOODY-STUART, Chairman of the Board of Directors, Hermes Equity Ownership Services and the United Nations Global Compact Foundation

“The United Nations Global Compact is a major initiative in the worldwide effort to ensure the fair distribution of the enormous wealth generated by the globalization of corporate capitalism, an initiative of interest to all nations, corporations public and private, and the present and future citizens of the world. These papers are the state of the art in the scholarly examination of the international efforts on the part of private enterprise to assist in economic development and forge peace.” —LISA H. NEWTON, Fairfield University
